# **Career Values**

Have you ever considered a career and thought about the money you'd make, the people you'd be working with, or the amount of time you'd be spending at work? These thoughts are connected to your Career Values, which can greatly affect your job satisfaction and fulfillment. You may not find a career that aligns with all of your values, but identifying what's important to you and considering them in the context of your chosen/desired career is an essential and ongoing part of your career journey.
