UNIVERSITY OF
SASKATCHEWAN

Convocation procession in the Bowl, May 1928. A-1666

Convocation Procession - University of Saskatchewan
Saskatoon Sask. May 4, 1928

PETER STOICHEFF

Today is a celebration of all you have accomplished as a student at the University of Saskatchewan. The countless hours spent in labs, libraries and classrooms culminates with you walking across the stage, in front of student colleagues, university and family supporters, to receive your U of S degree.

This is a significant milestone in, not only your life, but the lives of all of those who have supported you during your academic pursuits. On this occasion, I offer you my sincerest congratulations.

With your degree in hand, you join more than 150,000 U of S alumni around the world. As part of that esteemed group, you help share the U of S story, a story that tells people in Canada and internationally that your institution is a distinguished member of Canada's top research-intensive universities, with an enormous impact on the country and, in select areas, the world.

Neither you nor I know exactly what the future holds for you. You might pursue further education this fall. You might start down your career path in a week or two. You might even get on a plane later today leading to an entirely different kind of learning experience. But what I do know is that no matter what

direction you take, your time at the U of S has prepared you to face adversity and opportunity with equal measures of success, confidence and creativity. Because of that, awaiting you is a fulfilling and rewarding life in which you can contribute to what is important to you and to the world.

When you look at your degree, remember that you are backed by a rich and rigorous university education. Also remember the people, supporters and experiences that were a part of your time at the U of S, because those memories are as valuable as the degree itself.

I hope you stay connected to the University of Saskatchewan and share with us the meaningful events that make up your life's story. As part of our worldwide alumni family, you hold a special place in our hearts and I hope that your time on campus holds an equally special place in yours.

All the best,

A handwritten signature in black ink, reading "P. Stoicheff". The signature is stylized with a large, looped "P" and a long, sweeping underline.

Peter Stoicheff

President, University of Saskatchewan

JIM BLACKBURN

On behalf of the University of Saskatchewan's Alumni Association, I would like to extend our congratulations to our 2017 graduates and welcome you to the U of S Alumni Association.

Today, you join a family that includes 150,000 alumni in over 100 countries around the world.

For the past few years you have walked the pathways around the Bowl and have spent hours in classrooms, laboratories and libraries. You have shared all of these experiences, and so many more, as University of Saskatchewan students. You may have not known it at the time, but these experiences are not only shared with those classmates of yours here today, but with everyone who has been a U of S student since it was founded more than 100 years ago.

Today as you walk across that stage and receive your hard-earned diploma, degree or Ph.D., your name is added among the long list of researchers, inventors, business and community leaders, entrepreneurs, authors and artists who call themselves U of S alumni. It's an honour to be a part of this prestigious group; a group connected by our shared commonality of graduating from this historic institution.

This is an exciting time for our association as we celebrate our centennial year. One hundred years ago, a group of graduates came together to celebrate the success of all U of S alumni, past and present. They wanted to make sure their connection to their alma mater remained strong wherever they found themselves in the world. Today, the Alumni Association's goal remains the same; to connect all U of S alumni together and champion each and every one of their successes.

You are a student for a small amount of time, but an alumni forever. Go out and do great things knowing you are a member of the U of S alumni family – 150,000 and growing. I encourage you to keep in touch with us as you embark on your new adventure.

Take time to enjoy today's celebration; you have accomplished a lot and should be proud of your achievements! We look forward to seeing you again soon as we reconnect during our centennial celebrations.

THE HONOURABLE ROY ROMANOW

Roy Romanow was elected Chancellor effective November 1, 2016 for a three-year term. His appointment was confirmed at a meeting of University Senate on October 15, 2016 based on the recommendation of a joint nomination committee.

The Honourable Roy Romanow, P.C., O.C., S.O.M., Q.C., served in public office in Canada for more than 30 years.

Chancellor Romanow's provincial political career began in 1967 when he was first elected to the Saskatchewan Legislature. From 1971

to 1982 he served as Deputy Premier and Attorney General of Saskatchewan. He played a key role in the federal-provincial negotiations that resulted in the *Constitution Act 1982*, which includes the *Canadian Charter of Rights and Freedoms*. During this time, he also led the reorganization of Saskatchewan's court system, the creation of the Saskatchewan Human Rights Commission, and the introduction of a modern Legal Aid system.

In 1987, Chancellor Romanow became the Leader of the Opposition and served in this role until 1991. He then served as Premier of Saskatchewan from 1991 to 2001. During this period, major health reforms were introduced based on programs of well-being, which balanced the delivery of health care more appropriately between acute care and preventative programs. A significant achievement of the Romanow government was turning Saskatchewan's large fiscal deficits into balanced budgets.

After his tenure as premier, Chancellor Romanow was appointed by then Prime Minister Jean Chrétien in 2001 to head the Royal Commission on the Future of Health

Care in Canada, which resulted in a final report entitled *Building on Values*.

Chancellor Romanow, an officer of the Order of Canada and recipient of the Saskatchewan Order of Merit, has also received the Pan American Health Organization's 2003 Administration Award for his work with the Health Commission and his commitment to human rights and justice initiatives. In 2004, he became a member of the federal Privy Council through a five-year appointment to Canada's Security Intelligence Review Committee. From 2008 to 2013, Chancellor Romanow was the Advisory Board Co-Chair and Spokesperson for the Canadian Index of Wellbeing. He currently serves as a Member of the Elections Canada Advisory Board, and as the co-chair of the Canadian Alliance to End Homelessness.

Currently, Chancellor Romanow is a Senior Fellow in Public Policy in the Department of Political Studies at the University of Saskatchewan. He received both his B.A., 1960, and LL.B., 1964, from the U of S. He is recognized as one of the 100 Alumni of Influence and is the recipient of numerous honorary degrees from Canadian universities.

Our ceremony

The convocation ceremony is a calling together of the new graduates of the University of Saskatchewan, symbolizing the historical practice of calling together all former graduates. In current times, the major functions of convocation

are the election of representatives to university governing bodies and the admission of candidates to degrees. The chancellor, appointed by senate as the chair of convocation, is the highest official and spokesperson of the university.

The convocation ceremony marks the transition from the role of student to the holder of a degree with its accompanying rights and privileges.

The ceremony, solemnized in the presence of the university community and family and friends of the graduands, consists of three parts: a procession marking the leaving of the old status and entering the new; the president's statement to the graduands, the secretary's petition and the chancellor's consent for their admission; followed by individual presentation by a university orator and admission by the chancellor to the degrees to which they are entitled.

As graduates are admitted to their degrees, a graduation hood, which has a colour symbolizing a particular degree, is placed over each graduate's head.

ENTRANCE

Graduands in their academic dress march in procession into the ceremony in the following order: graduands in the order in which their degrees are to be conferred; faculty; board of governors; senate; guests of honour; the president; the chancellor; the lieutenant governor. When the members of convocation reach their places they remain standing during the Vice-Regal Salute, the singing of “O Canada” and the invocation.

ORDER OF THE CEREMONY

The first business is the conferring of honorary degrees, followed by convocation address, president’s statement to the graduands, the conferring of degrees and the presentation of awards. The meeting is closed by the chancellor rising and leading the procession in the reverse order out of the hall.

THE PETITION

The university secretary on behalf of all the candidates, addresses the chancellor and senate in the following words:

“Eminent Chancellor, Mr. President, members of the University Senate and Board, I present to you the petition of the Council of this University that the candidates to be named, having fulfilled all the requirements of the bylaws, may, with your permission, be admitted to the degrees and certificates to which they are entitled”.

THE ADMISSION

The chancellor then addresses the candidates:

“By virtue of the authority vested in me by the legislature of this province, and with the consent of the council of this university, I consent to admit you to the degrees and certificates to which you are entitled and to invest you with all the powers, rights and privileges pertaining thereto.”

THE PRESENTATION

The university orator approaches the chancellor from the left and presents the candidates:

“Eminent Chancellor, on behalf of the faculty of _____, I present to you these scholars and ask that you will confer on them the degree of _____.”

Each candidate then comes forward and the degree hood is placed on his or her shoulders. As the orator speaks the candidate’s name in full, the candidate moves forward in front of the chancellor. Then the chancellor says, *“I admit you”*. Hereupon the candidate passes to the chancellor’s right, is greeted by the dean of the faculty, or designate, and receives the degree parchment.

DEGREES IN ABSENTIA

In such cases, the university secretary says:

“Eminent Chancellor, in the name of the faculties, I ask you to grant the degrees and certificates, in absentia, to those students who have met the requirements to graduate, but were not able to be present today.”

ACADEMIC DRESS

Academic dress lends an element of colourful pageantry to the convocation proceedings. This traditional clothing—worn on a daily basis at universities in earlier times—is now reserved for ceremonial functions.

At the University of Saskatchewan, the following academic dress is adopted for all appropriate occasions: The gown resembles a long cape with full sleeve cut to elbow and terminating in a point for the bachelor's degree; with long sleeve and a semi-circular cut at the bottom for the master's degree; and with round open sleeves for the doctor's degree. The material is black broadcloth for the bachelor's, master's and doctor's degrees. The doctoral gown incorporates green and gold on the front and sleeve panels.

The hoods for the bachelor's and master's degrees are of black broadcloth. The master's and doctor's hoods have a lining and the bachelor's an edging (and in some cases, a lining) of a color distinctive of the character of the degree.

Ph.D. hoods have a green satin lining with gold trim and the honorary degree hoods feature a white satin trim. A velvet Beefeater style hat with a green, gold and white tassel is also part of the doctoral dress.

University orators

Our 12 orators hail from all parts of campus and perform a wide range of roles throughout the university, but all are gifted with resonant voices, pronunciation skills and share a fine attention to detail.

The post of university orator can be traced back hundreds of years to universities in the United Kingdom such as Oxford and Cambridge. Traditionally orators served as the official voice of the university, composing letters, giving speeches in Latin at ceremonial occasions and presenting candidates for honorary degrees.

Aboriginal culture

At the U of S, we have one of the highest populations of Aboriginal students among Canadian post-secondary institutions. As indicated in our Third Integrated Plan, one of our most influential documents, it is important to us to

include Indigenous knowledge and experience into our daily practices, curriculum and celebrations.

At convocation, one of our most important celebrations, we display the Treaty No. 6 flag, Métis flag and sing an honour song.

HONOUR SONG

These are special songs to demonstrate respect for an individual or group in recognition of their accomplishments such as a return from military service or other events. In some families, individuals have their own song, which is sung for them when they are being honoured.

MÉTIS FLAG

The Métis flag has been a symbol for the Métis Nation since as early as 1816. The infinity is a representation of the joining of two cultures—forever intertwined, a people forever. The flag is nationally recognized by the Métis Nation across Canada.

GRADUATION POWWOW

The University of Saskatchewan Graduation Powwow is a celebration of the accomplishments of Aboriginal Students. The Graduation powwow highlights First Nation, Métis and Inuit students with song, dance and honoring the commitment of everyone involved in the post-secondary experience. We are proud to host such an event that gives Aboriginal people an opportunity to show case culture and academics.

Our chancellors

This spring we welcome the Honourable Roy Romanow as our 15th University of Saskatchewan Chancellor. As executive and ceremonial head of the university, the chancellor has a de facto seat on the Board of Governors. Other duties include, but are not limited to, conferring degrees at convocation ceremonies and acting as a university ambassador to the external community. Romanow joins a distinguished list of leaders including former chief justices, premiers and a prime minister.

Grit McCreath (BEd'91)

Grit McCreath has a long history with community service and the University of Saskatchewan. She has served as both a member of the U of S Senate and Board of Governors. In 2011 she received a spot on the College of Education Wall of Honour and most recently has been named the University of Saskatchewan ambassador.

Ross Phillips (MSc'11)

Ross Phillips is one of the founding members of the Cross Canada Canoe Odyssey, an expedition that took over 149 days to complete and spanned from Vancouver to St John's. The award-winning trip showcased the importance of Canadian freshwater resources to culture, identity and the environment. While at the University of Saskatchewan, he investigated the role of dynamic basin scale hydrological connectivity on runoff generation in heterogeneous drainage basins, specifically in Canada's taiga shield region.

Ashley Smith (LLB'07)

A jack of all trades, Ashley Smith has found a balance between her love of law and the arts. An active member of the Saskatoon law-community, Ashley sits on several boards. She's a sessional lecturer, a published author and coaches a U of S moot team at the College of Law. She's also passionate about performing in the arts and has performed in theatre and ballet.

**Myron Stadnyk**

(BE'85) Myron Stadnyk was appointed President and CEO of ARC's Resources in 1997 and has helped the company grow from a \$200 million start-up to an eight billion dollar company. ARC's production has grown to become one of Canada's top 10 energy producers, employing over 500 employees and, at times, over 1,000 contractors.

**Dr. John Wedge**

(MD'69) A leading innovator in complex surgical hip construction, Dr. John Wedge is seen as the international authority on the subject. His expertise is demonstrated by his mentorship, publications and world lectures. Among his many accomplishments, Dr. Wedge co-founded SickKids International – a paediatric specialty service for developing countries. In 2006 Dr. Wedge became an Officer of the Order of Canada for his outstanding contributions to Paediatric Orthopaedic Surgery in Canada and beyond.

**Audrey Zettl (BSN'63)**

Audrey Zettl has travelled extensively as a community health nurse, spending the majority of her career in northern Saskatchewan and the Territories where she made a positive impact on the lives of several Aboriginal communities. She co-founded Harvest Community Incorporated which looks to enhance the lives of those with intellectual disabilities.

Preserving heritage

By chronicling the history of the Western Canadian fur trade, creating the precursor to the Saskatchewan Provincial Archives, and pushing for a provincial archives act, U of S historian Arthur Silver (A.S.) Morton ensured that a critical part of Canada's story was preserved for future generations.

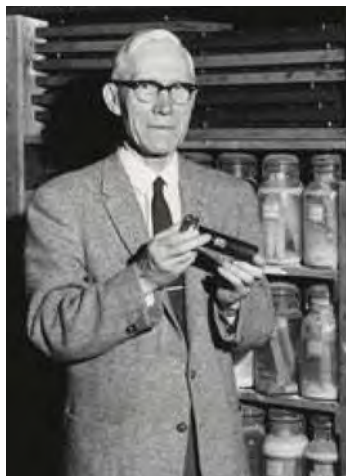

Improving life for kidney patients

The pioneering work of U of S clinician researcher Dr. Marc Baltzan—who performed the third kidney transplant in Canada in 1963—put Saskatoon's University Hospital on the map among world leaders in transplant surgeries and led to the creation of the Saskatchewan Transplant Program in 1989.

Building a better beer

Professor Emeritus Bryan Harvey (BSA'60, MSA'61) was an early pioneer in the area of barley breeding. Harvey and his research partner, Brian Rossnagel, created more than 50 types of barley, including the well known Harrington, which has been a dominant variety in Canada for more than 20 years.

Concrete contribution

U of S professor Thorbergur Thorvaldson and his team developed a formula for sulphate-resistant cement that made concrete more durable and led to a world-wide change in the manufacture of commercial concrete. In 1966, the Chemistry Building on campus was renamed the Thorvaldson Building in his honour.

Canola development

U of S researchers contributed to the development of canola, a bright yellow flowering oilseed crop that generates about \$26.7 billion in economic benefits to Canada annually, with 250,000 people working in careers related to the industry. The name "canola" was chosen to represent "Can" for Canada and "ola" for oil. Canola is the world's only 'made-in-Canada' crop.

A legacy of nuclear medicine excellence

U of S medical physicists Harold Johns and Sylvia Fedoruk developed the cobalt-60 unit in 1951, setting a new global standard for cancer treatment and paving the way for the U of S to become a leader in areas of nuclear medicine, biomedical imaging and related research.

Leading the world in lentils

U of S scientists have been key to Canada's success in pulse crops, and a great measure of credit goes to U of S Professor Emeritus Al Slinkard, whose crop breeding research has helped make Canada the global leader in lentil exports, and put Saskatchewan at the heart of the country's pulse industry.

KIM COATES

Actor, producer, Kim Coates, is best known for his portrayal of “Tig” on the FX hit series *Sons of Anarchy*. Much like the character he portrayed, Coates has feared nothing throughout his career that has spanned all genres in film, television, and stage.

Kim’s film career began in 1991 with *The Last Boy Scout*. Since then, he has starred in over fifty films, including Academy Award winners *Black Hawk Down* and *Pearl Harbor*. Just opened this year in theatres are *Officer Downe* and *Goon 2*.

Kim starred on Broadway as Stanley Kowalski in *A Streetcar Named Desire*, as the title role in *Macbeth* at the legendary Stratford Theatre, and has appeared in over fifty plays in North America.

In the fall of 2017, Kim will be all over the small screen. Coates will co-star with Jeff Daniels in the Netflix mega western mini-series, *Godless*, written and directed by Scott Frank. As well, Coates co-produced and starred as ‘Declan Gardiner’, in the based-on-a-true-story mini-series, *Bad Blood*. Co-starring Anthony LaPaglia and Paul Sorvino for Rogers Media Inc., it was

written by Michael Konyves and produced by Mark Montefiore.

Kim was recently awarded the 2016 Actra Award of Excellence for his body of work, charity work (including Creative Kids in Saskatchewan), and for his continued support of the Canadian film industry. At the 2009 AOF International Film Festival in Pasadena, Kim received the Half Life Achievement Award for acting. Kim also won best actor for playing Steve Sorrano in *King of Sorrow*.

Coates has become a leading force in the world of acting, and his versatile volume of work speaks for itself. With a strong acting ethic and his ability to be a performer who defies stereotypes, he has generated both critical acclaim and a passionate fan base over the course of his career.

EARL COOK

He is a founding member of the Saskatchewan Métis Veterans Association.

Earl has served on a number of committees throughout the years. For several years he served on the Indian and Métis Curriculum Advisory Committee, working closely with Saskatchewan Education. He was the committee's representative on the Core Curriculum Advisory Committee in the 80's. He served on the Saskatchewan Indian Languages committee. He has been active in the Northern Labour Market Committee and its sub-committees, and which include: the Education Sub-committee, Mineral Sector Sub-committee, Forestry Sub-committee, Health Sub-committee, Northern Apprenticeship Committee.

Earl has been serving the public, particularly in the north, and the province for the past 45 years.

FREDERICK MULDER

Frederick Mulder was raised in Eston, Saskatchewan, and educated at the University of Saskatchewan (B.A. Honours in English), Brown University (M.A., Ph.D. in Philosophy), and Oxford University.

After Oxford Frederick set up in London UK as a dealer in European printmaking 1470-1970, from Durer to Picasso, and his firm, Frederick Mulder Ltd, based in London UK, is one of the world's leading specialists in Picasso's printmaking, and has placed material in public museums and private collections all over the world.

He is the Founder and Chair of Frederick Mulder Foundation, funded from the profits of his business; the foundation envisions a world which is fair, secure and environmentally sustainable, and in which the rights of future generations are respected in decisions taken today. Towards those ends it primarily funds organisations which address the development of social change philanthropy, the threat of climate

change, and the persistence of global poverty.

Frederick is also the Founder of The Funding Network, started in London but now active in 16 countries, that does live crowdfunding for social change projects. It has supported well over 1000 projects based in every continent.

He won a Beacon Fellowship Judges' Special Prize in 2004 for his contribution to pioneering, innovative approaches in philanthropy, and the Spears award for Lifetime Achievement in Philanthropy in 2013.

He was made a Commander of the Order of the British Empire (CBE) by the Queen in the UK New Year Honours 2012.

HERB PINDER

Herb Pinder is a third generation Saskatonian and a successful entrepreneur, lawyer and former National Hockey League player agent.

Herb graduated from the University of Saskatchewan with a BA in 1967 and followed that with a Law Degree from the University of Manitoba in 1970, and an MBA from Harvard Business School in 1975.

During the three years of undergraduate study he was a member of the Saskatoon

Blades. Following a strong final season he and his brother Gerry joined Canada's National Hockey Team in Winnipeg and competed for Canada in the 1968 Winter Games in Grenoble France, winning a Bronze Medal. His hockey career ended shortly thereafter by way of a skiing injury.

Herb returned home in 1975 and for ten years formed part of the leadership team at Pinders Drugs. Having left the family business, he focused on his sports representation business acting for professional hockey players with respect to their contractual and financial affairs. He also led an ownership group which acquired the Regina Pats Hockey Club which set a Canadian Hockey League record of 40 or more wins all seven years.

An active director, Herb has served on more than 40 boards including public and private corporations, crowns, and non-profit organizations. Some notable businesses include Canadian Airlines, SaskOil/Wascana Energy, Viterra (the former Wheat Pool which became Canada's largest agribusiness

company), and now ARC Resources (one of Canada's leading energy companies). Non-profit activities included national organizations such as Canada's Sports Hall of Fame, the Manning Center for Innovation, The Banff Centre for Management, and currently The Business of Hockey Institute where he serves as the Chair of the Board. His strong interest in public policy led to serving the C. D. Howe Institute, The School of Public Policy at the University of Calgary, and currently The Fraser Institute where he is the Chair of the Governance Committee. Herb is currently an Honorary Colonel of the 38th Service Battalion.

Herb is an Honored Member of both the Saskatoon and Saskatchewan Sports Halls of Fame, and the Manitoba Hockey Hall of Fame. He is a fitness advocate and remains active in golf and skiing.

Herb resides with his wife Madeleine. Their son Scott is pursuing a Doctorate of Physical Therapy at the University of Melbourne and daughter Danielle is a 2019 MBA candidate at Berkley.

HAYLEY WICKENHEISER

Hayley Wickenheiser is regarded as one of the best female hockey players in the world. As a decorated Olympian, she has led her team to four gold and one silver medal as well as being named the tournaments' most valuable player in both 2002 and 2006. For the 2014 Sochi Olympics, Hayley was selected to be the flag bearer for the Canadian Olympic team in the Opening Ceremonies. During those same Olympics it was announced that she had been elected to the International Olympic Committee's (IOC) Athletes Commission.

As part of the Canadian Women's National Team since age 15, Hayley has won innumerable regional, national and world championships.

Off the ice, Hayley's achievements include: *Sports Illustrated* number 20 of 25 Toughest Athletes in the World, a two-time finalist for the Women's Sports Foundation Team Athlete of The Year, named multiple times among the *Globe and Mail's* "Power 50" influencers in sport, and named among QMI Agency's top 10 "Greatest Female Athletes in the History of Sports." In 2011, Hayley was appointed to the Order of Canada "for her achievements as an athlete and for her contributions to the growth of women's hockey." She was inducted to Canada's Walk of Fame in 2015.

Hayley has seen success not just on the ice, but also as an elite softball player, as she participated in the 2000 Summer Olympics as a member of Team Canada and worked as a Softball Analyst with CBC's coverage of the 2008 Beijing Summer Olympics.

Wickenheiser's passion for sport is matched

by her desire to give back to the community in her work with organizations such as JumpStart, KidSport, Project North, Right to Play and dozens of other organizations. She has travelled the world to support those efforts, including trips to the furthest northern communities of Canada and as far away as Rwanda and Ghana.

Her most profound project has been the creation of the Canadian Tire Wickenheiser World Female Hockey Festival, which hosts over 1,500 female hockey players from around the world in Calgary annually giving girls access not just to hockey, but to world-class educational sessions both on and off the ice.

Hayley was born in Shaunavon, Saskatchewan and is a proud mom to her teenaged son, Noah. She has received numerous honorary degrees and graduated with honours with a Bachelors in Kiniesology from the University of Calgary in 2013. In 2016, Hayley completed her masters, running a study that is researching the connection between physical activity and the neurology of autistic youth.

BOB XIAOPING XU

Bob Xiaoping Xu is the founder of ZhenFund and one of China's most celebrated angel investors. Established in 2011 as a joint fund with Sequoia Capital China, ZhenFund is China's foremost angel fund, with 400 portfolio companies and offices in Beijing, Shanghai and Palo Alto. ZhenFund has played a leading role in China's rise as a "startup nation", and is widely considered a beacon of light in China's vibrant startup environment.

Prior to founding ZhenFund, Mr. Xu co-founded China's largest private English training and test preparation group, New Oriental Education (NYSE: EDU), along with Michael Yu and Victor Wang. Their endeavors, which helped drive Chinese education toward a new global era, was featured in the box office hit *American Dreams in China*. The movie ranked as #3 domestic box office hit in 2013.

Mr. Xu's success as an educator and an entrepreneur led him to angel investing, where he has pioneered a unique investment philosophy of investing in exceptional people. He became one of the most prolific patrons of entrepreneurship, as well as a leading mentor to young business leaders. *Forbes Magazine* has honoured him on the Midas List as one of the World's Top 100 Venture Capital Investors for two consecutive years (2016 and 2017). Mr. Xu currently serves as the Chair of China Angel Investment Association.

Mr. Xu has more than 11 million followers on Weibo, the Chinese version of Twitter. He is also a prolific author who has published

seven books on career growth and education. His writings, speeches and interviews on entrepreneurship, investment and education have had an immense impact on China's emerging business leaders, and particularly on those who have studied abroad. He is the president of Committee 2005, an institution that gathers the most influential Chinese overseas returnees, including the likes of Robin Li, Neil Shen and Lee Kai-fu.

Mr. Xu is deeply committed to philanthropy. He is a founding donor and the Committee Acting President of the Future Science Award, an annual award of USD 1 million for scientists who have made significant contributions to life sciences and physical sciences in Greater China.

Mr. Xu graduated from the Central Conservatory of Music, the Chinese equivalent of Juilliard School of Music, with a bachelor's degree in music. He received his master's degree in music from the University of Saskatchewan. Prior to that he was a counsellor at Peking University for five years.

MAUD FERRARI

The New Researcher Award is given every year to two faculty members at the University of Saskatchewan who have made outstanding contributions to their disciplines. Maud Ferrari, Associate Professor in the Department of Veterinary Biomedical Sciences in the Western College of Veterinary Medicine, is a 2017 recipient of this prestigious award.

Dr. Ferrari received her B.Sc. from the University of Grenoble, France in 2003

and her Ph.D. in Behavioural Ecology at the University of Saskatchewan in 2009. In recognition of the outstanding quality of her doctoral work, Dr. Ferrari was awarded the Governor General's Gold Medal for Best Ph.D. Thesis at the University of Saskatchewan (2009) and the prestigious NSERC Doctoral Prize for Best Canadian Ph.D. Thesis in the Natural Sciences (2010). After an NSERC Post-Doctoral Fellowship at the University of California, Davis, Dr. Ferrari returned to the U of S to join the Department of Veterinary Biomedical Sciences in 2011.

Just six years after coming back to the U of S, Dr. Ferrari has already emerged as a world leader in the field of aquatic and behavioural ecology. Her research focuses on predator-prey interactions, particularly on how aquatic animals recognize their predators, assess their risk of predation, and avoid being captured, by modifying their behaviour, morphology or life histories. She has also recently used a sensory and cognitive approach to investigate the effects

of environmental changes associated with human activities on predator-prey dynamics and community structure. Dr. Ferrari's work on the impact of ocean acidification on predation-related mortality of coral reef fishes has drawn international attention. Understanding how environmental change affects the way animals sense and perceive their environment is a highly promising venue to understand and predict the ecological consequences of environmental stressors in aquatic systems.

To date, Dr. Ferrari has published 140 peer-reviewed papers, most of which are in top-tiered journals. Her papers have been cited over 4,500 times, a strong measure of the importance of her work to her field. She has given numerous invited talks around the world, has been an associate editor for four international journals, and was the 2011 recipient of the Outstanding Young Investigator Award from the Animal Behaviour Society.

HAYLEY HESSEIN

Hayley Hessein has been with the department of Agricultural and Resource Economics since 2003 and from the beginning it was clear she was passionate about teaching as evidenced by her breadth and willingness to teach a variety of courses at all levels. Her track record, her enthusiasm, and her commitment to her students make her an effective teacher, but her tireless efforts and continuous improvement of her teaching style, and her adoption of innovative methodologies is what sets her apart from others.

As an associate professor in the College of Agriculture and Bioresources, Hessein's teaching philosophy is effectively to apply a coach approach in her classroom and to create an exciting and fun learning environment. To this end, she presents herself in an authentic manner, provides insight into the importance of the curriculum and uses innovative techniques that embed student learning. To this end she coaches students to take ownership and responsibility for their own growth, not only in the classroom but for the remainder of their academic programs and beyond.

She presents herself in a respectful and positive way. She practises active listening techniques and promotes critical thinking by asking open-ended questions. She encourages debate and collaboration. Her willingness to continue her own education to enhance her skills in this regard has been very well received by students in all of her classes. She embodies her coaching and teaching philosophy through her actions.

Hessein's teaching evaluations clearly

demonstrate that her teaching format is being well received and having a significant positive impact on student learning. Students speak about the knowledge they have gained and the essential skills such as communication, collaboration, and critical thinking they have honed. Hessein develops competencies in her students to lead themselves, enabling them to fulfill their potential and to lead others.

She creates an active and dynamic learning environment that encourages all students to participate and to think very broadly and openly about a range of ideas. Students comment directly about critical thinking, their ability to see new perspectives and how they are encouraged to learn. Furthermore, Hessein has adapted her classes to be able to take advantage of new findings and methods that support better delivery of economic content.

Most recently she has been certified as an Executive Coach, and has been exploring different psychological tools to better understand the role of emotional intelligence in teaching and learning.

PAM KOMONOSKI

Pam Komonoski has over 30 years of health care experience under her belt—the majority of that serving the campus community as a nurse practitioner.

Pam completed the registered nursing program at the Saskatchewan Institute of

Applied Science and Technology, Kelsey campus (now known as Saskatchewan Polytechnic) in 1985, and soon after started within the orthopedics unit at Royal University Hospital in Saskatoon. She joined the University of Saskatchewan Student Health Centre in 1988, where she continues today as a nurse practitioner.

Pam's technical expertise and compassionate nature has greatly influenced and enhanced the work environment and patient experience at the campus clinic. A passionate health care provider to the university community, Pam acts with the utmost care and concern for her young patients. She frequently goes above and beyond her clinical duties to collaborate with student groups on campus and support many student-run initiatives.

A valued source of knowledge in the clinic, Pam has formed strong relationships with her colleagues. In addition to direct patient care, Pam is instrumental with the leadership and organization of the clinic, assisting in the hiring process and serving as a mentor to new staff from varying disciplines.

Her relationship building extends outside the clinics as well, not just with faculty and students, but with the wider health care community as well. Pam was instrumental in expanding the role of nurse practitioners in the province, and is a member of the Saskatchewan Association of Nurse Practitioners, the Nurse Practitioners of Saskatchewan (having served as a vice-chair and a committee member) and the Saskatchewan Registered Nurses Association.

HOWARD WHEATER

Dr. Howard Wheeler holds the positions of Canada Excellence Research Chair (CERC) in Water Security, Programme Director, Global Water Futures program funded by the Canada First Research Excellence Fund, and Director, Global Institute for Water Security at the University of Saskatchewan, and Distinguished Research Fellow and Emeritus Professor of Hydrology at Imperial College London, United Kingdom (UK).

Dr. Wheeler has significantly influenced flood, water resource, and water quality research and application linked to the development of a sustainable society. In the UK he was a member of the 2004 and 2008 Foresight Future Flooding teams, a member of the 2008 Cabinet

Office flood enquiry, and contributor to a Land Use Futures Foresight study. In Canada he chaired the Council of Canadian Academies expert panel on Water and Agriculture in Canada.

Dr. Wheeler is the founding director of the Global Institute for Water Security at U of S, which is a multidisciplinary institute that integrates expertise of over 200 scientists from 15 different academic units. Since its inception in March 2011, GIWS has secured a total funding of \$241 million, which includes the \$143 million Global Water Futures program having 156 partners, including more than 380 researchers from 18 Canadian universities. The Global Water Futures program is unprecedented in scope and magnitude—at a time of unprecedented environmental change, it addresses the strategic water security needs of Canada and 50% of the world's population. The Global Water Futures program is the largest university-led water research program ever funded worldwide.

Over the course of his distinguished career, Dr. Wheeler has authored more than 200 peer-reviewed journal papers, 33 books and book chapters, and supervised some 60 Ph.D. and 100 M.Sc. students. A Fellow of the Royal Academy of Engineering and the American Geophysical Union, he won the prestigious

Prince Sultan bin Abdulaziz International Prize for Water in 2006. Dr. Wheeler is also a frequent advisor to governments and international agencies around the world, including the Middle East, Far East, North America, Africa, South America, and Europe. He has represented Hungary and Argentina at the International Court of Justice, and recently was a member of a Court of Arbitration in The Hague in a dispute about the Indus Waters Treaty. He is currently an expert consultant to the Republic of Chile concerning a water conflict between Chile and Bolivia, also before the International Court of Justice. Dr. Wheeler's key-note addresses during 2016 include participation in the International Court of Justice's 75th birthday celebrations, attended by Ban Ki Moon and the King of The Netherlands. Dr. Wheeler was the only non-lawyer invited to address a workshop to review International Court of Justice practice and future needs. Until 2014, Dr. Wheeler was vice-chair of the World Climate Research Program's Global Energy and Water Cycle Exchange project. Currently, he leads UNESCO's GWADI arid zone water program and NSERC's \$5 million Changing Cold Regions Network. Dr. Wheeler's research, work with governments and international organizations all over the world, and outstanding leadership has contributed measurably to sustainability efforts worldwide.

GOLD MEDALS**JONATHON DOERING**

Jon moved to Saskatoon from Moose Jaw, SK in 2004 to pursue a B.Sc. at the University of Saskatchewan. He received a B.Sc. in Biology in 2009. As an undergraduate, he began working as a research assistant at the Toxicology Centre in the Environmental Toxicology Laboratory of Dr. John Giesy. In 2010 Jon began his M.Sc. in Toxicology

and in 2012 he transferred into the Ph.D. program under the supervision of Dr. Markus Hecker. Jon's Ph.D. thesis, "Predicting the Relative Sensitivity of Sturgeons to Aryl Hydrocarbon Receptor Agonists" describes a mechanistic model capable of predicting toxicities of pollutants to fishes from genetic information. During graduate studies,

Jon published 20 peer-reviewed papers, presented 50 lectures and 36 conference papers, and received 28 awards, including the Vanier CGS and Dean's Scholarship. Jon currently holds a National Research Council Fellowship with tenure at the US Environmental Protection Agency's Office of Research and Development.

ZHI-WEI WANG

Dr. Zhi-Wei Wang was born and raised in Shanghai, China and received his B.Eng. (Summer 2010) in Physics and later his Ph.D. (Summer 2016) under the supervision of Dr. Tom Steele at the University of Saskatchewan.

Zhi-Wei's Ph.D. thesis, "Aspects of Radiative Symmetry Breaking in the Standard Model and Beyond" for the first time suggested that a Coleman-Weinberg Higgs can be consistent with a 125 GeV Higgs found at the CERN LHC

without fine-tuning any of the parameters. He also showed that viable dark matter candidates can fit in this paradigm with a minimal extension of the Standard Model. In addition, the robust analysis methods developed in this thesis are deep and far reaching and applicable to more general Standard Model extensions.

Aside from research, Zhi-Wei took an interest in teaching while in graduate school and during

his final year as a Ph.D. student held a sessional lecturer position in the Department of Physics and Engineering Physics, teaching a group theory course with a deep connection to particle physics.

Zhi-Wei has recently been a joint postdoc among University of Waterloo, CP3-Origins, and University of Saskatchewan working with two leading physicists in the world Robert Mann and Francesco Sannino.

SILVER MEDALS

CLAIRE LIU

Claire Liu is the recipient of the 2017 Governor General's Silver Medal. She is graduating today with a Bachelor of Science Four-year Degree with Great Distinction with a major in Physiology and Pharmacology.

Claire is originally from Regina, and is fluent in Mandarin and Chinese.

She received a number of financial awards for her scholastic achievements throughout her

post-secondary studies, including the College of Pharmacy and Nutrition and College of Medicine Interdisciplinary Summer Student Research Award, the Wolfe Family General Achievement Entrance Scholarship, and the U of S NSERC Undergraduate Student Research Award.

Throughout her studies, Claire was active with volunteering for Best Buddies Canada, a program to help people with intellectual

disabilities. She also worked in several roles with the USSU Help Centre. Claire is also an accomplished pianist and vocalist and she enjoys yoga and tennis. For the past 13 years, Claire has been an active member with the Regina Chinese Canadian Association.

Claire's future plans include becoming a physician and a researcher in health sciences, and continuing to be active and engaged with volunteering and community work.

DANIEL McCLOSKEY

Daniel was born and raised in Calgary, Alberta, where he graduated from Bishop Carroll High School in 2012 before beginning engineering at the U of S in the same year. After his third year of engineering physics he participated in the Waterloo Institute for Quantum Computing's Undergraduate School on Experimental Quantum Information Processing (USEQIP) before working as an NSERC sponsored research assistant at the institute. During this time he became the second author on a research paper on optical quantum communication systems that was

later published in the journal Physical Review Letters. The following summer he worked again as an NSERC sponsored researcher, this time in an experimental condensed matter physics group at the U of S. In his final year he was the vice-president of the recently-formed student group SaskInvent, which seeks to apply engineering, medical, and business knowledge to the solution of practical problems in health care.

Daniel discovered a passion for applied mathematics through his third year

engineering physics classes, which inspired him to begin taking courses towards a degree in applied mathematics in 2015. Daniel is graduating with a degree in engineering physics from the College of Engineering and a degree in applied mathematics from the College of Arts and Science. He will be moving to Melbourne, Australia in July to begin a Ph.D. in physics at the University of Melbourne. His research will focus on applications of physics to the design of neural prosthetic devices, such as sensory (ie. retinal) prostheses and direct brain-computer interfaces.

Biomedical Engineering – Thesis: Affective Interface – Toward a Machine that Exhibits its State Emotionally

Co-Supervisor: Madan Gupta

Co-Supervisor: Wen Zhang

Mahsa Mafi

Iran

Biomedical Engineering – Thesis: Signal Processing Methods for Heart Rate Detection Using the Seismocardiogram

Co-Supervisor: Paul Babyn

Co-Supervisor: Francis Bui

Edgar Enrique Martinez Soberanes

Mexico

Mechanical Engineering – Thesis: An Adaptable Single-cell Trapping Device for a Wide Range of Cell Sizes.

Co-Supervisor: Martin Reaney

Co-Supervisor: Wen Zhang

Co-Supervisor: Ildiko Badea

Matthew Peter McDonald

Saskatoon

Mechanical Engineering – Thesis: Predicting Distal Radius Fracture Load during a Fall using Mechanical Testing and Peripheral Quantitative Computed Tomography

Co-Supervisor: Saija Kontulainen

Co-Supervisor: James Johnston

Lav Mittal

India

Mechanical Engineering – Thesis: Identifying the Flow Conditions in Pneumatic Conveying of Wheat Grains through Horizontal Straight and Bent Pipe using Pressure Drop

Co-Supervisor: David Sumner

Co-Supervisor: Scott Noble

Shahed Khan Mohammed

Bangladesh

Electrical Engineering – Thesis: Efficient Encoding of Wireless Capsule Endoscopy Images Using Direct Compression of Colour Filter Array Images

Supervisor: Khan Wahid

Nahakul Nepal

Nepal

Electrical Engineering – Thesis: Comprehensive Risk Assessment for Reliable Power System Operation

Supervisor: Rajesh Karki

Michael Raymond Wallace Newton

Turtleford

Electrical Engineering – Thesis: Evaluation of Single Event Effects Using the Ultrafast Pulse d Laser Facility at the Saskatchewan Structural Sciences Centre

Supervisor: Li Chen

Kalaivani Pachai Chettiar Sadasivam

Edmonton, Alberta

Electrical Engineering – Thesis: X-Ray Dose Dependence of Dark Current in Amorphous Selenium Alloy X-Ray Photoconductors

Supervisor: Safa Kasap

Jason Pannell

Saskatoon

Electrical Engineering – Thesis: Multi-Band Subsynchronous Damping Controller for Type III DFIG Wind Turbines with Single Mass and Multi-Mass Rotor Models

Supervisor: Ramakrishna Gokaraju

Ian William Patrick Paulson

Foam Lake

Mechanical Engineering – Thesis: The dynamics of towed seeding equipment

Co-Supervisor: Allan Dolovich

Co-Supervisor: Scott Noble

Reisha Dayle Peters
